

Gustavo Fontenelle Belmiro

AI Automation Developer | Full Stack

Rio de Janeiro, Brazil | (21) 97654-6644 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer specializing in AI automation and system integrations. I have hands-on production experience with n8n, LLM APIs (OpenAI, Gemini, Claude) and intelligent agent development. Additional background in game dev with Verse (UEFN/Fortnite) and Lua, giving me strong knowledge of real-time systems and event-driven logic. Advanced English with professional experience in the United States. Focused on delivering value from day one.

TECHNICAL SKILLS

- **AI & Automation:** Advanced automations with n8n, LLM API integration (OpenAI, Gemini, Claude) and intelligent agent development
- **Frontend:** React, Next.js, TypeScript, JavaScript, HTML/CSS and Tailwind
- **Backend & Databases:** Python, REST API development and consumption, Webhooks, data modeling, PostgreSQL, Supabase and HeidiSQL
- **Game Dev:** Verse (UEFN/Fortnite), Lua, real-time interactive systems, in-engine UI
- **Tools & Infrastructure:** Git, bot development (Discord), system maintenance and support

PROFESSIONAL EXPERIENCE

Personal Projects / Freelance | [Full Stack Developer & AI Automation](#) 2024 – Present

- Built custom CRMs, landing pages and API integrations for personal projects and clients.
- Developed AI agents using n8n, OpenAI, Gemini and Claude to automate business processes.
- Integrated webhooks and REST APIs into automated workflows, eliminating manual work from repetitive processes.

Ninja Studios + Level 8 & CataLendas | [Junior Developer — Game Dev](#) 2024 – 2025

- Developed complex logic and scripts in Verse (UEFN/Fortnite) and Lua for real-time interactive systems.
- Handled project infrastructure directly, including performance optimization and critical bug resolution.
- Integrated external services via API and structured databases for secure storage of user data.
- Served as the sole technical developer responsible for all architecture decisions across projects.

Lubes em Foco | [Intern / Developer](#) 2021 – 2024

- Structured and analyzed complex data from the oil and gas sector (import and export).
- Developed automated reports applying strong programming logic, data manipulation and structural organization.

Work and Travel Program (USA) | [The Highlands Resort](#)

Worked in a fully English-speaking professional environment, focused on problem-solving, adaptability and communication in a multicultural setting.

EDUCATION

Bachelor's Degree in Computer Science *Expected: Jan 2027*

Universidade Estácio de Sá
